How to Download & Setup SaferWatch App

Step 7
Select your country.

### Step 8
Enter and verify that your phone number is correct.

Step 9
You will receive a text to the phone number you entered. Enter the confirmation code from the text here.
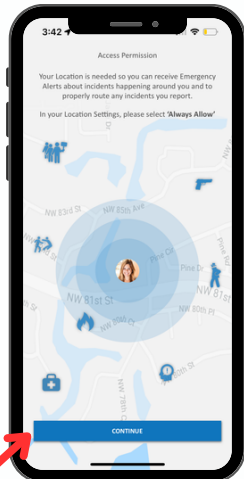

Step 10

Create a 4 digit combination code that you will always remember.
You will need this code if you are canceling an emergency report to verify it is you.
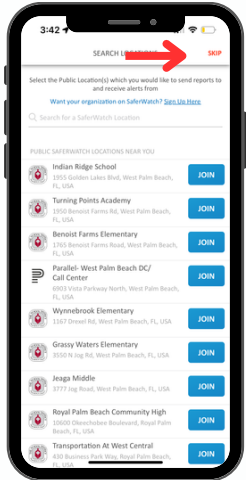

Step 11

Set your location status to "Always Allow" for the SaferWatch app in order to receive emergency alerts.
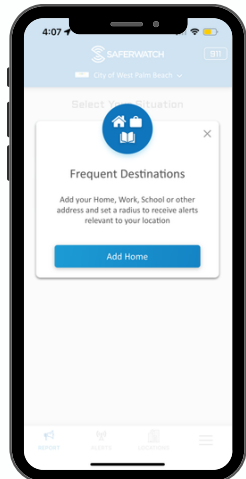

Step 12

"Allow Notifications" from the SaferWatch app to receive non-emergency and emergency alerts and push notifications.
