of  
Transition

The Lion  
1968

## FOREWORD

We have been a part of the social upheaval necessary and vital to the future of America.

The Lincoln University of our experience was also in the midst of environmental transition. During our four years here, we witnessed and became a part of, the old and the new. Each of the changes which affected us was judged on the basis of our early experience at Lincoln, and whether those changes themselves would be beneficial to our institution, and to ourselves in an increasingly involved search for our identity. In our moments of reflection, we will forever cherish our scholarship, leadership, and Rabble; and most of all, our earliest memories of Lincoln: which suddenly became a changing campus in a changing world.

This yearbook gives an account of our Lincoln experience; an experience rich in the traditions of old-----"Dear Lincoln...thy sons will 'ere be true."

# DEDICATION

We, the class of 1968, in reflecting upon what events, situations, crises, and relationships have occurred since our freshman year, have concluded that although we have passed through an era of transition, we have profited most, not by an outstanding academic record, but by a deeper insight into life and a more firm realization of what being human really means.

Thus, we dedicate, with the warmest sincerity, our yearbook to the memory of Donald Vincent Stewart, whose passing brought about one of the most profound changes in the minds of many Lincoln students.

Don was from the Pen Hills section of Pittsburgh, Pennsylvania. He was a memorable classmate, a fine friend, and a lovable person. He was very fond of science, nature, and art. He enjoyed reading anything and everything. An individualist and an idealist. . . . Don was a thinker.

# TO THE CLASS OF 1968

The history of Lincoln University is organic. Yet every class and every student generation has its unique qualities, and in every student generation transitions from one level of operation to another, from one point of view to another, from one type of psychology to another, may be noted. It would be difficult, however, to find a period of transition more intense, and at the same time broader, than the past four years at Lincoln University. In many ways the campus of Lincoln University manifested the cross currents of thought and action sweeping across the United States and the world. The black revolt, psychological, political and social, had its counterpart on this campus. And the escalation of the war in Viet Nam contributed a great deal of ferment. The shifting emphasis on the national scene from DE JURE to DE FACTO freedom and equality was reflected on the campus. As some students put it, emphasis on emancipation gave way to emphasis on pride and self-respect. All of this was apparent in changing vocabulary and in changing dress and in hair styles. It was apparent each year in the rise of groups with different labels, each stressing racial uniqueness, pride, and historical contributions in one way or another. Student participation was sought and became more active in the past four years than it had in previous college generations.

On another level, the past four years marked serious elements of transition in Lincoln's development. Residential coeducation began with fewer than twenty young ladies in 1965; within three years there were over 200 coeds on the campus. A college which had enrolled normally about 300 students reached almost 1,000 in enrollment in the fall of 1967. At the same time, the faculty more than doubled within two years, actually lowering the faculty-student ratio to a point where student contact with faculty members could be greater than ever before. Each year in the past four at least one building was constructed, and the facilities were improved in some way. Many new courses, programs, and several new majors were added to the curriculum, along with the new members of the faculty. Particularly in the humanities, the last four years provided a transition in academic opportunities for Lincoln students. All the departments in the humanities were strengthened, and the opening of a Fine Arts and Humanities Center symbolized a new balance to the work at Lincoln University. Sciences, social sciences, and humanities reached levels in opportunities and in quality hitherto unavailable to the students at the University.

With all these developments and changes, we hope that you have achieved at Lincoln a base of knowledge and understanding on which to build. We trust you have learned that cynicism and despair are no match for faith and hope. We hope, also, that you operate on the assumption that horizons are unlimited, that life is very much worth living, and that the pursuit of freedom and equality is a never-ending pursuit in which all of us must be committed to participate as fully as we can and in whatever vocation and way of life we happen to function.

Faithfully yours,

Marvin Wachman

TO THE CLASS OF 1968 --

In other days when one spoke of power blocs, he was referring to the alliances among nations. Today, we hear of Black Power, White Power, Green Power and Student Power, among others. In the passionate scramble to become aligned with some of these power blocs, men in our universities must not forget the power of the human intellect. Man's hope for a better, a more humanitarian existence depends upon the extent to which the human intellect can control and direct his passions. Where reason and emotion are compatible the individual makes a better life for himself and for the society of which he is a part.

James Bonner MacRae  
Dean of Students (retired)

TO THE MEMBERS OF THE GRADUATING CLASS:

Lincoln University has grown in many ways since you have been here.  
 It is our hope that you too have grown and have been motivated to learn.  
 Yes, learn that some information remains only a short time but ideals and spiritual values will continue to beckon you beyond your present goals.  
 As you leave Alma Mater seek wisdom - remembering that Alma Mater grows in service to others as you participate and contribute to society in constructive ways.

TO THE CLASS OF TRANSITION - The Class of '68

Advice givers are legion - there will always be someone to advise and criticize. But a man must carry within himself the ultimate criteria of his behavior - and if he has satisfied himself as to his integrity, then hopefully he can recognize that this in itself is an accomplishment.

Many in the class of '68 have begun to attain this goal. My wish is that it will be achieved by all.

## THE LION STAFF

### 1968

The LION Staff owes its gratitude to everyone in the Lincoln University community who showed a working interest in the yearbook. The staff would like to acknowledge especially those people who unselfishly gave of their own much needed time, materials, patience, and effort to the punctual completion of the LION '68.: to Dr. H. Alfred Farrell, our yearbook advisor; to Dean Graham of the American Yearbook Company, whose patience and understanding appeared stronger than our own; to Thomas Moyer, for our title page drawing; to the Office of Public Relations, for valuable photographs; to members of the student body, for photographs and photography; and finally, to the members of the faculty and administration, for their encouragement and suggestions.

"Cynthi" transferred from Spelman. Finding the ratio of women reversed she took advantage of the situation by "icing" everybody, then endeared herself as one of the first true Lincoln women.

"Dick the Body" is one of our more outspoken classmates. While at Lincoln, noticeable changes occurred in the content rather than the volume of his speech. This should aid him in his chosen field, law.

"Sparegrass" was a small-town boy who tried to convince the Rabble otherwise. He distinguished himself with his numerous "Cheyenne" runs and was one of the stalwarts of the Houston Rabble.

"Twig" Branch was a transfer from Howard U. Possessing an outgoing personality, he immediately established himself as a foremost rabbler, a connoisseur of fine liquors, and a fine athlete.

"T-Byrd" will graduate via a circuitous route; from Lincoln to Howard back to Lincoln. He was known for his outspokenness, which sometimes caused him embarrassment.

"J. R. " was what we considered a "fool-hardy" chem major. Yet, we knew that his dedication to science would not be in vain, in spite of the hair that he lost. One of his most noted accomplishments was wearing one pair of jeans for four years.

"Cool-bert" was a transfer from Howard. This caused him to become a lover of the highways and bi-ways. Later, he was one of the first men in our class to enjoy co-education.

"Crabbie" was quiet, technically-inclined student who, when aroused, acted explosively. We will always remember how Jesse's heel marks got on the ceiling of Room 120, McCrary Hall.

"Terrible Tom", one of our most respected (feared) campus figures, dominated the cafeteria and the Ville with his very presence. But beneath the exterior, Tom was a serious and fair-minded young man who could give as well as taste.

Contrary to his nickname, "Benny Boo-Hoo" did not complain all the time. A quiet, hardworking individual, he will be remembered for his timely rabble comments and New York excursions.

"Jack Dawks" was surreptitious material fighter with a deafening voice and a Brooklyn accent. A founder of "Sleasy Psi Phi", "Jack" abandoned the wine long enough to provoke deep thought with his philosophical rabble... as seen here.

A serious student of chemistry, "Dat" will be remembered for his perseverance under "Wild Bill".

UDO EKANEM

Udo was a conscientious student whose serious nature should stand him in good stead in future endeavors.

"Paul" punctuated his late arrivals to meals with pungent comments. Between fighting material and playing soccer, he wisely spent his weekends off-campus.

When aroused, "J. B. 's" usual quiet and shyness gave way to profound rabble. We will remember his ability to "lay cool" in the face of adversity.

Morris fulfilled the popular stereotype of the intellectual. A radical to the core, he was brimming over with political schemes and coup d'etats. '68 predicts that Morris will be read about someday.

"Bill" was a quiet student who successfully mixed marriage and education.

"Geno" was a cool character from "de islands, mon!". A member of the Steel Band, "Geno" will be remembered for his women, his runs, and his ability to consume prodigious amounts of alcohol.

BMOC is a perfect description of "Beaucoup". He was a unique combination of intelligence, dedication, and humor. "Beaucoup" will be remembered for his stormy affairs with campus honeys, and his competency in serving in leadership positions.

"Bosco" established himself as a manipulator of students, and sometimes professors. He will long be remembered for his "sleazy moves" which sometimes resulted in campus improvements.

"Sandy": Sandy, the other coed of our class, was known for her warm personality and predication for classroom slumber.

"Rick the Head" was a natural leader, whose extrovertive personality attracted a large following on campus. Combining humor with seriousness, Rick was never too busy to lend a helping hand to those in need. And his legendary exploits in mischief will be long remembered.

"Hlabi" was a quiet, unassuming individual who will be remembered for his diligence in pursuing his studies.

Versatility was the word that describes "Beaver". An accomplished orator, he became a campus leader and spokesman. In spite of his rabble moments, "Beaver" courageously maintained his convictions.

As a student of Chemistry, "Mars" was supreme. His industrious attitude will be long remembered.

Another stalwart of the Houston Rabble, "Foot's" assets were his sense of humor and discretion. He will long be remembered for the consequences which occurred when he forgot this discretion and became intoxicated.

"Joe" was another "head" who reaped the benefits of coeducation. He will be recalled for his easygoing, middle of the road disposition.

Kiprop wan an introspective individual who is to be recalled for his diligence and industry.

"Danny" was a modest person who fought his material but not infrequently answered "The Call of the Rabble". Remember his war with "Foot" in that Freshman Wrestling Tournament.

"Lumpsum" A quietly humorous personality "Lump" possessed a peculiar brand of rabble. Perhaps this was due to the chemicals he spent so much time with. He will be remembered for his constant material-fighting.

"Weasel" Weasel was an extreme example of the "Old School." He was an eminent weekender, and a truly consistent rabbler. He could often be found staring enviously at empty wine bottles. His memory will linger on in respect and amusement.

"Space Ghost" Tom was a modest personality who took his work seriously, and took his "tastes" and "runs" in moderation. However, his use of the "Ville" was not entirely residential. His discretion in this realm will be enviously remembered.

"Big Max" distinguished himself as a consummate rabbler, B-Ser, and card shark. Tales of his days at Lincoln would interest followers of the absurd.

"Mickey" was a carefree student who enjoyed dancing and piano music. While at Lincoln, his moods ran the gamut between pessimism and a cynical optimism.

"Freddy" was a quiet and unassuming student who occasionally injected radical thoughts into heated rabble sessions.

A soccer star par excellence, "Beale" was also an outstanding student and leader. But we will most remember his secret female visitors and his undercover weekend runs.

A Maine resident was a rare find at Lincoln. Still, "Big John" managed to sustain the rabble and the vigorous demands of the Lincoln chem lab.

That lonely figure running through the woods and back roads was "Curtis", our class athlete. Looks like he's ready for some exuberant and tasty rabble.

Suave and studious, "Obie" will be remembered for his urbane sophistication and his flashy prowess as a soccer star.

Lincoln will remember "Amadi" as an outspoken classroom orator and his meticulousness as a student.

"Felix" Felix was a consummate politician, and should rise high in his homeland. He will be remembered for his honesty and sincerity.

"Sunday's" unassuming personality caused him to be overlooked at times. Even his best friends could not find him, for he rarely studied in one place consistently.

A composed individual, "Ani" could always be found in the library, diligently at work. As he would say: "This man is a very serious student."

#### Camera Shy

"Martin" was a serious individual who often studied in the dinner line. He will surely combine business with a pleasurable appetite.

"Vic" was a reserved rabbler who fought his material, drank his liquor, and rapped to his honey without publicity. Coolness was his outstanding attribute.

Although his rabble escapades were humorous, "Peteet" was our class politician. A straightforward individual, he worked hard to improve his alma mater.

An incessant talker, "Norm" will be remembered for his voluminous verbage and his extreme exaggerations during rabble sessions.

"Skar, the Grime Minister" took life and his bohemianism seriously. The bizarre, the way-out, and the radical were his specialties. To be sure, Mike was at home in Lincoln's unusual atmosphere.

An Air Force veteran, "Carl" was the biggest man on campus. Working nights in the Student Union, he helped many Lincoln rabblers "bite the dust."

A transfer student, Morley's main man became a permanent fixture in W. T. Johnson's chem lab, and like so many others, fought "horrible material".

For four years Cordell remained somewhat of an enigma. He was quiet, yet not introverted. Known as "George" to his frat brothers, he was a dedicated person and a responsible student.

"Snake" Charlie went through so many changes during his four years that it is difficult to find the real him. Intellectually inclined, he could always be depended upon for deep rabble, out of which sometimes came useful ideas. We will always remember his "metamorphosis".

Equally at home with rabble, women, and rum, "Big Al" managed to squeeze in his books, and make plenty of Moravian runs.

"Morley" came to Lincoln after two years of study in the West Indies. Upon meeting Messrs. Johnson, Rudd, and company, he usually recuperated from the vigors of the chem lab by making runs to Philly.

A Tennis buff, "Tony" always maintained his cool. He was unpretentiously pleasant and sincere who did not take his endeavors lightly. "Tony" finished in January, and we envied him as he "hatted up".

"D. T." was The Class Clown. He exhibited a propensity for vociferous debate, and despite the high-jinks, seldom failed to bring the truth to light. "D. T. 's" policy was: Loud or be louded!

"3rd Degree Burn" was one of the last of the Old School Radicals. He gained widespread fame as a writer, rabbler, and lush. He will be remembered for his Lincolnian editorials and his many words of wisdom.

A survivor of 67.5, "Carl" absolutely hated his real nickname. But his brand of rabble was endless and called for "much jollies". We'll remember how "Carl" remembered all of his former classmates.

"Trying harder" was "Coke Bottles'" motto. He became very involved in campus schemes and organizations. He will be remembered for his enthusiasm, however misdirected it may have sometimes been. He is a winner.

Although he made many runs "Lenny" will be remembered for taking on more jobs than he could handle, and for bringing Nu Gamma Alpha to Lincoln's campus.

"C.O." had an easy-going personality, but was also a hard rab-

"Cap'n Crunch" was a familiar figure in Oxford,  
buying "groceries". A resident of the Ville,  
"Crunch" often fought material in the Canteen,  
and rabbled about his old days in Philly with the  
"Valley".

When the "Feasterville Flash" first arrived at Lin-

community, he became a connoisseur of low grade  
vintage.

# History Of The Class Of 1968

In September of 1964, the institution known as Lincoln University was fortunate enough to experience the greatest turn of events in the history of the school. Through the highstone arch and onto the green rolling pastures of Chester county came the class that belittled the adventures of Ghengis Khan caused Sir Edmund Hillary's mountain to melt and made Colt 45 a very common place experience. Yes, to this campus came the fully united, extremely inventive and definitely unbeatable class of 1968, composed of 239 male students and 5 female students.

Our Freshman year was one of quick-passing and many awakening moments, under the leadership of Richard O'Daniel-President, Ralph Byrd--Vice President, Eddie Harrison-Treasurer, and Carol Patterson--Secretary. There were great moments of hazing and prep rallies, from which many upperclassmen felt the wrath of this well organized class. There were periodic boxing matches in the hallways of our BEAUTIFUL dormitory, in which students would accidentally hit one another in the face due to the hallways being lighted by candles.

This was also the year in which many changes and confrontations were made and met by this class, which was caught in a period of transition and administrative conflict; such as the using of an all male dormitory for the housing of female guests on weekends and the forcing of the Health, Welfare, and Discipline Committee to have an open meeting concerning one of our more colorful classmates, who had a tatoo of John L. Sullivan on his chest . . . ahem" . . . B.MF.R., who by the way challenged the class to two duels, one of which was fought by way of "SNOWFLAKE en BVD's" and the other which was by "LOBBY au STOMPING".

As the year drew to a close, the class of 1968 had become known as the one with unfailing unity, a sense of responsibility and a great will for progressive changes, as the political air of the campus began to change under the influence of Dr. Charles V. Hamilton, who also entered Lincoln the same time as the class of 1968. Yes--it was a very good year.

Our Sophomore year began with much rejoicing and partying as old acquaintances were once again together. The leaders for this year were, David Petett--President, Richard E. Hill--Vice-President, Arthur James--Treasurer, and Kenneth Spaulding--Secretary. Many of the members of this class were living in one dormitory named McCauley Hall, but some time after this class became the inhabitants, the building was somehow re-named "Sin City", which to this day none of the members of this class understand why. During this year some of the classmates were seized with an overwhelming increase in their appetites; and in an attempt to appease their hunger they went to the canteen to eat. They returned to "Sin City" with an unestimatable amount of food, which they were all too glad to share with others. This would have been just another example of the charitable nature of this class had it not been for the fact that, when they were acquiring these superb delicacies the canteen was CLOSED.

This would have been just another example of the charitable nature of this class had it not been for the fact that, when they were acquiring these superb delicacies the canteen was CLOSED.

Then on a cool evening in December, the class of 1968 was asked to attend a festival at Cheyney State College which took place about 1 o'clock in the morning. The small number (27) of students who were able to attend, had a wonderful time. They danced ON everyone.

During this year there was one very tragic event which had a very gripping affect on many students on this campus. This was the loss of a very dear friend and class-mate, Mr. Donald V. Stewart, who before his passing ignited many progressive and necessary ways of thinking. Six of his classmates attended his funeral and acted as pall-bearers. This year was also a year of many new realizations and achievements. It was the year for pledging for fraternities, adopting individual thinking patterns and for the completion of the fine arts building. . . Ware Center. Work was also started on a new men's dormitory, and last but not least increasing the number of female students living on campus, which quite naturally instigated the first "Panty Raid" in the history of the University.

The Junior year for this dynamic class began much the same as the year before, only under the leadership of Richard E. Hill--President, David Petett--Vice-President, Alric Simmons--Treasurer, and Dwight Taylor--Secretary. The majority of the class now had residency in the Vet's Ville, which was known for being the moral pillar of the Lincoln community. The class had now been reduced to about one-half of it's original size due to the draft, failing grades, frustration, and unexplainable incidents. Two of the most popular members of the class, Ted Hawkins and John Imes, transferred; "Hawk" to a morticians' school and John to a college of engineering.

But those members remaining were now becoming very strong and stable in their thinking and very honest in their evaluation of life. They played important parts in campus life by keeping their unity and expressing their strength when necessary, such as in a demonstration against the Administration for attempting to expel three young ladies on very groundless charges.

This was also the year when members of this class were vying for the position of President of the Student Government Association. The candidates were Richard E. Hill, Arthur James, and Charles Saunders, of which Richard E. Hill was elected. In the spring semester construction of a new women's dormitory was began, to house the increasing number of female students. The school was more recognizably under a state of tremendous political, social, and academic transition, which this class working as one, weathered beautifully.

The class had now been reduced to about one-half of it's original size due to the draft, failing grades, frustration, and unexplainable incidents. Two of the most popular members of the class, Ted Hawkins and John Imes, transferred; "Hawk" to a morticians' school and John to a college of engineering.

But those members remaining were now becoming very strong and stable in their thinking and very honest in their evaluation of life. They played important parts in campus life by keeping their unity and expressing their strength when necessary, such as in a demonstration against the Administration for attempting to expel three young ladies on very groundless charges.

This was also the year when members of this class were vying for the position of President of the Student Government Association. The candidates were Richard E. Hill, Arthur James, and Charles Saunders, of which Richard E. Hill was elected. In the spring semester construction of a new women's dormitory was began, to house the increasing number of female students. The school was more recognizably under a state of tremendous political, social, and academic transition, which this class working as one, weathered beautifully.

Now the Senior year is upon us, and under the guidance of David Petett--President, Alric Simmons--Vice-President, Alton Chitty--Treasurer, and Cynthia Amis--Secretary; we look back, we question, we ponder, and we answer things that in our Freshman year, we might not have understood as well as we do now. We realize at the same time that we will be confronted in the future with more things we will totally understand only after we have experienced them. We speculate about the future and exactly what it has in store for us. We think about friends who have and will be splitting apart at the end of the year. Even now, just a short period from graduation, we can feel the anxiety, the pressure and in some cases the fear of what is wanted and what WILL be received.

So in passing through the four years here at Lincoln, we the class of 1968, which has maintained our status as a unified group, have been involved in personal as well as institutionalized transitions, and have learned many, many things applicable to life. One of which is "A man is only a man" and we know that uncertainty and insecurity will always exist, but they can be overcome by an unselfish sense of unity.
