SPECIAL COLLECTIONS  
LANGSTON HUGHES MEMORIAL LIBRARY  
LINCOLN UNIVERSITY  
LINCOLN UNIVERSITY, PA 19352

Dear Lincoln, Dear Lincoln  
To thee we'll e'er be true!  
The golden hours we've spent beneath  
The dear old Orange and Blue

Will live for e'er in memory  
As guiding stars through life;  
For thee our Alma Mater dear,  
We'll rise in our might.

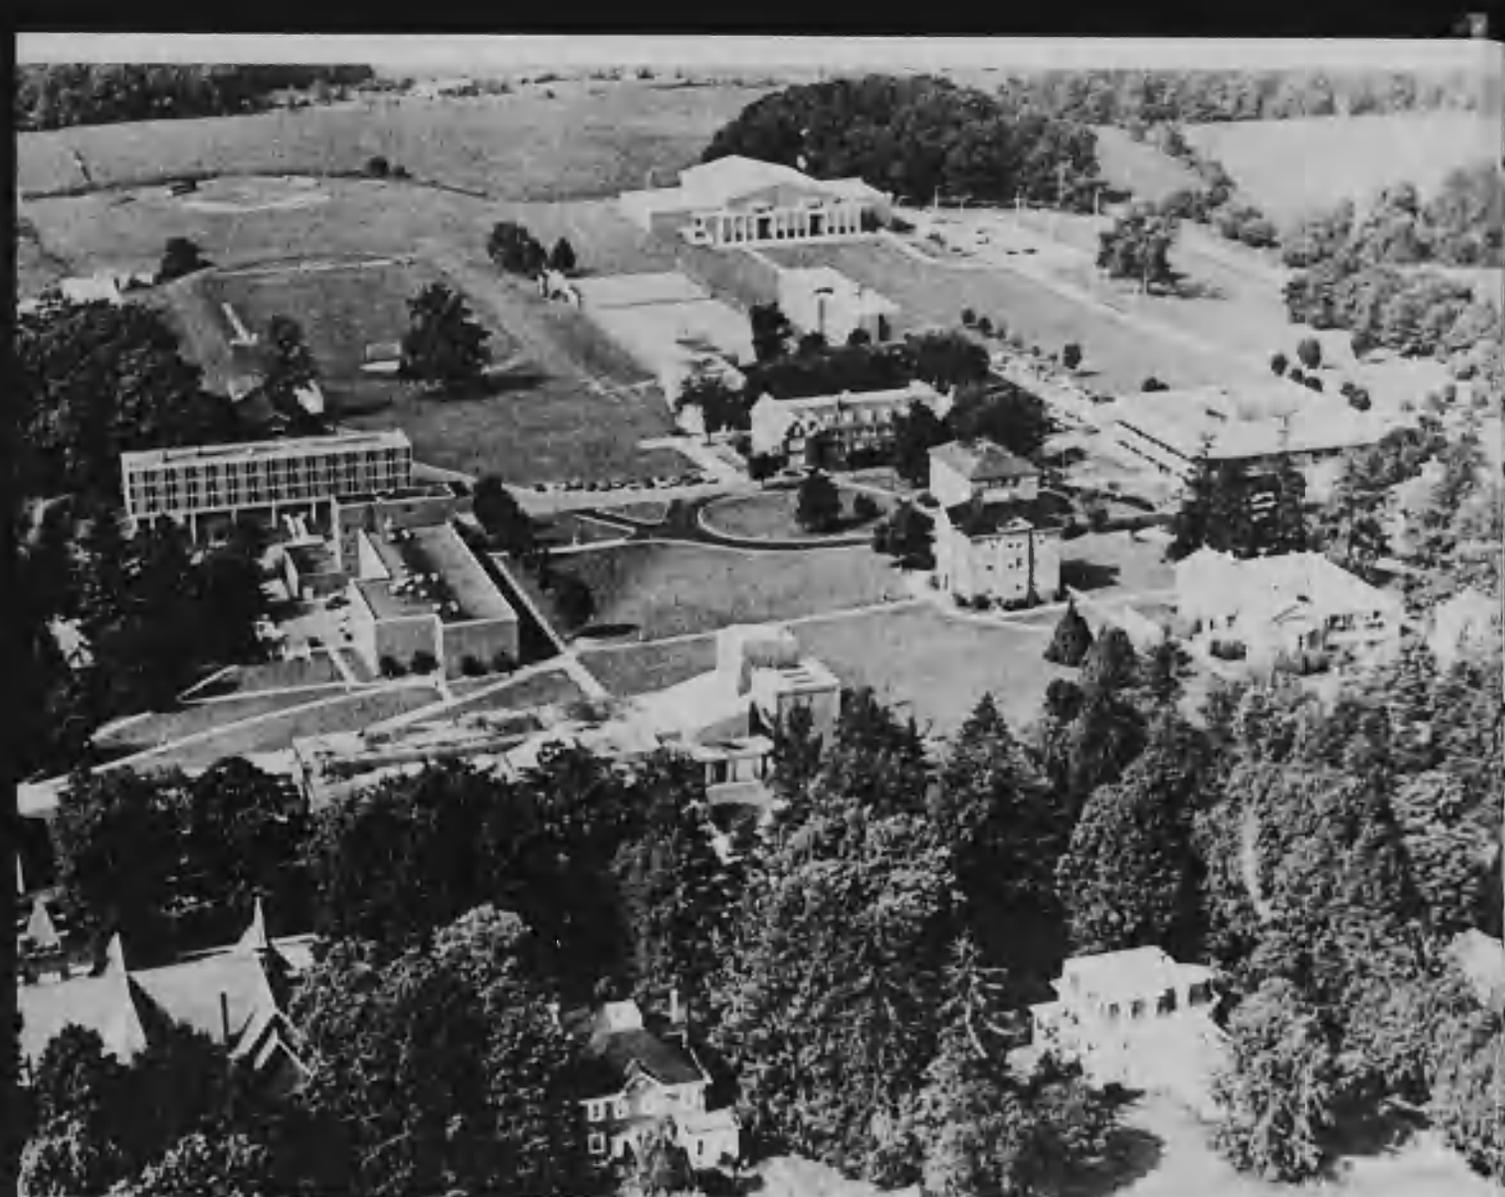

For we love every inch of thy sacred soil  
Every tree on thy campus green;  
And for thee with our might  
We will ever toil  
That thou mightest be supreme.

We'll raise thy standard to the sky  
Midst glory and honor to fly;  
And constant and true.  
We will live for thee anew.  
Our Dear old Orange and Blue  
Hail! Hail! Lincoln!

A. Dennie Bibb, '13

Give Lavishly! Live Abundantly!

The more you give, the more you get-

The more you laugh, the less you fret-

The more you do unselfishly,

The more you live abundantly . . . . .

The more of everything you share!

The more you'll always have to spare-

The more you love, the more you'll find.

That life is good and friends are kind.

Enriches us from day to day.

Philosophy of Life: "In Remembrance"

Please, understand that death is not our way, we are the people of life, "to die for the people", is not our saying. It is the mumbling of words by martyrs and westernized death-wishes, lost, in their warped sense of eternity. We the Black people are the people of life and death is not a weapon that can be used to stop our life-movements ever again.

To the Class of 1979:

From time to time as you look back over your years at Lincoln, you will come to realize that these were "the good old days" that you might have used more wisely than you did. But have no regrets for what might have been, for you will need all your wits about you to learn to adjust to a cold, cold world. Profit from your mistakes rather than continue to make the same ones. If you remember that you came to Lincoln to learn, you will find life far more rewarding if you go forth to serve your fellowman. As you leave these hallowed halls for a place in the sun, take these words of Tennyson with you: "To strive, to seek, to find, and not to yield." They have sustained me through the years!

Sincerely yours,  
H. Alfred Farrell

TO THE CLASS OF 1979:

For the last few days, I have been reading material on radiation damage, energy needs, and public policy in preparation for a talk next week before a group of lawyers. Strange words have presented themselves--rad, rem, and frightening words such as lethal-dose-50. This activity prompted me to wonder to what extent have your years at Lincoln prepared you for this imminent world of the 21st Century.

What do you know of the history and culture of China, for example, the people who now constitute 25% of the world's population? What do you know of the history and culture of India, the people who constitute another 15 to 20% of the population? The projections are that the population of the world cannot stabilize before it reaches 10 billion people, roughly 2 1/2 times what the population is now. Have you thought of the problems of such a world? Especially have you thought of what it means for us, for America? Now we are approximately 6% of the world's population but are using 40% of its energy. Clearly if all the people of the earth were to use energy at the same rate as we, the energy sources would have to be increased about sevenfold. All the evidence now is that such an expansion is impossible. America must look towards using considerably less and less energy in your lifetime.

In your social sciences, you have heard of a statement attributed to Lord Acton that "Power corrupts and absolute power corrupts absolutely." His reference was to political power. Now we may propose a similar aphorism for physical power which is energy per unit of time: "All power pollutes and easily available power pollutes worse." Thus no easy solutions exist. We do not have at present any realistic methods of producing energy acceptable to every group. In the far future, bright young people will devise means of using solar energy and fusion. (Fusion is how the sun generates its energy.) That time seems far in the future, but now we can speculate on "solfus" as being the major future energy sources for mankind.

We hope that Lincoln has aided you in developing the qualities most necessary: the ability to learn on your own and the enthusiasm to learn. Although you may know little of China and India now, you can learn. But above all, you appreciate how crucial is your obligation to learn more of the problems of our society, of which energy may be the most determinative.

One of the greatest mathematicians of our time, David Hilbert, had as his motto: "Wir müssen wissen; wir werden wissen." "We must know; we shall know." May that spirit go with you from Lincoln. With it you can help wipe away the prevailing appallingly shallow conception of human nature and move man to the just society.

Cordially and sincerely yours,

Herman R. Branson  
President

To My Classmates:

The Lion of the Class of 1979 is truly a living testimony of the cooperation of our class. It is ours and may we cherish and enjoy it for many years for what it typifies.

The Yearbook Staff of three created this book of memories as best they could with the resources available.

As Editor I feel that the Lion '79 does not exemplify the standards of any project that I am overwhelmingly proud to affix my signature. However, the Editor must bear the weight of success or failure of a project. I am Woman enough to do that!

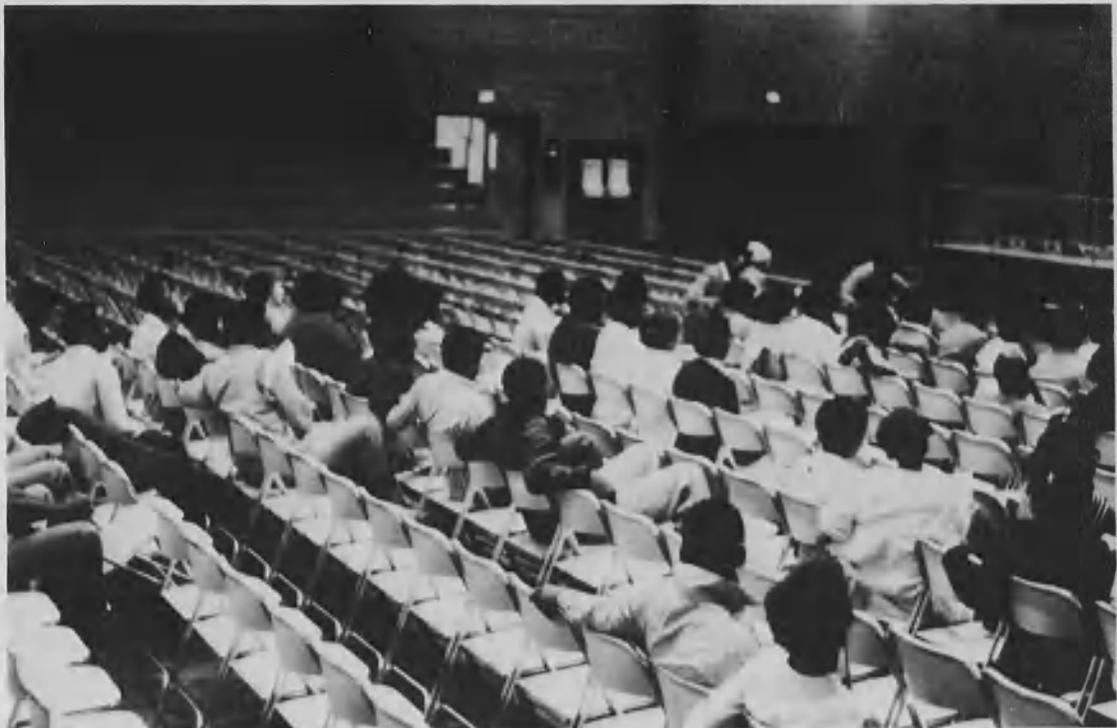

To all my classmates, may I wish you the Best of Luck in your endeavors.

Sincerely,  
Kimberly Long  
Editor in chief
